

Arizona Miner.

WM. O. O'NEILL, Editor.

REPUBLICAN TICKET.

The Standard Bearer of 1884:

FOR PRESIDENT,
JAMES G. BLAINE.
Of Maine.
FOR VICE-PRESIDENT,
JOHN A. LOGAN.
Of Illinois.

FRIDAY.....AUGUST 1, 1884

BLAINE AND THE ENGLISH.

The following, clipped from the London Spectator, but echoes the sentiments of the English people, who see as the only result of Blaine's election a curtailing of these arrogant pretensions of which the British Government has too often in the past flaunted not only in the face of the American people, but has forced upon every petty tribe and principality that has dared to maintain its rights when the same clashed with the tyrannous scheme of British aggrandizement and land theft.

"Mr. Blaine's nomination is, therefore, a blow to every sound English Liberty and would be even if he were not so pronounced Jingo. But then he is a Jingo of the extreme type. He has always defended what is in principle a policy of conquest. He is believed to hold that the time has arrived when the United States should become the North American republic, should persuade the Canadian Dominion to join it and extend its direct authority down to the isthmus of Panama. He was, moreover, the Secretary who denounced the Clayton-Bulwer treaty and its principle the joint guardianship of the Panama Canal—upon the ground that the United States must control the interoceanic water-way, and who during the Peruvian war endeavored to induce the Spanish-American States to place themselves under the avowed protectorate of the American Government. He claims, in fact, for the Union, under different forms, a sovereignty, or at least an effective and acknowledged leadership throughout the two Americas, adding that the trade States like Peru naturally belong to the people of the States and not to those of Europe. Some of his schemes no doubt are either more moderate in reality than they seem on paper, or are defensible from the American point of view. He can hardly wish to conquer Canada, though he may desire to absorb it, and remembering our own feelings about the Suez Canal, we cannot wonder at American suspiciousness about a work which will be the direct water-way between the eastern and western States of the Union. But we must remember also that no Spanish-American or Indian who speaks Spanish wishes to be a citizen of the Union, that they must be subjugated to be drawn in, and that there is therefore a flavor of aggressiveness and hauteur in all Mr. Blaine's utterances which is distinctly Jingo and will be watched by all Liberals with the suspicion with which they watch Lord Beaconsfield."

THE NEW ORLEANS EXHIBITION.

The latest accounts state that work on the buildings in which the New Orleans Cotton Exposition is to be held is being rapidly pushed forward. It is thought that all the buildings will be completed and exhibits in position on the opening day. This exposition promises to be one of the grandest that has ever been held in this country, and its friends claim it will rival the Centennial of 1876, held in the city of Philadelphia. It will certainly be a great event for New Orleans and the South in general. Undoubtedly many of the people of the Northern States will visit this exposition and compare notes with their business brethren of the South. Such a comparison can only result in a better understanding between all sections, and a knowledge of the needs of our whole country.

Hon. M. Van Arman has addressed a communication to the Secretary of State calling his attention to the absence of any quarantine on the border line between this Territory and Mexico, and his inability to establish any in the absence of any direct statutory law authorizing him to do so. In conclusion Secretary Van Arman urged that some immediate action be taken by the national government to establish a quarantine of some description against the yellow fever now said to be prevalent in Sonora.

Geo. H. Ball.

Rev. Mr. Ball is pastor of the Hudson Street Baptist Church of Buffalo.

Charles Moore, a brakeman on Conductor Roberts' freight train, paid us a call this morning. He informed us that at 9 o'clock this morning when they arrived at Belmont, the highest point the A. and P. crosses the San Francisco Mountain divide, the water cars had icicles hanging on them six inches long.

Flagstaff Champion, July 19.

At the farthest it is said August 5th will witness the passing of trains over the new bridge across the Colorado river at The Needles. This, completed with the transfer of the Mohave branch of the Southern Pacific, which is said to be already accomplished, will make the Atlantic & Pacific not only the shortest, but the popular line for passenger travel and freight between the east and west and south and west.

The entire route of the Southern Pacific is now in good running order with the exception of the bridge at Yuma. Transfers of both freight and passengers are made at this point in such a short time that the delay scarcely made up.

It is announced under the head of "Educational Intelligence" that Governor Cleveland has been awarded the degree of P. M. by the Alaska University. "Political Mushroom."

If, as reported, the Lake Superior copper mines are giving out it will not be long before the market price will rise.

The Independent local voter will again come to the front this fall.

TO FIRST VOTERS.

(From the Burlington Hawkeye.)

My son, you will cast your first vote for President next November. I don't want to influence your vote. I don't want you to vote for a certain man just because certain other men do. I want you to sit down and think about it before you vote. I want you to be able to give a reason for your vote. I want you, on entering politics, to align with the party that has the purest, most progressive record. I don't care a cent, my boy, whether you are a Republican or a Democrat. There are honest men, patriotic citizens, good Christians, in both parties. Only, I don't want to see you walk up to the polls and cast your first vote with the party

That upheld human slavery as a divine institution.

That bought and sold men, women and babies like so many mules.

That fired on Fort Sumpter.

That for nearly five years fought to destroy the Union.

That opposed the issue of greenbacks when the government was fairly perishing for want of them.

That organized mobs and riots to oppose the drafts.

That swept American commerce from the seas with armed privateers.

That is the party of Eoss Tweed and Jefferson Davis.

That polls its heaviest majorities in the most vicious and ignorant precincts.

That is strongest in the states where the per centage of illiteracy is the greatest.

That has opposed every liberal and progressive measure in legislation during the past quarter of a century.

That was the defender of slavery.

That is the defender of Mormonism.

That slandered Garfield, and

That assassinated Lincoln.

Now, as I said before, my son, I don't care whether you are a Republican or a Democrat. Choose for yourself. Just keep away from the crowd whose record I have very briefly outlined. Find the party to whom this record belongs, and then forever after keep away from it. You need not be particular with which party you unite, if you don't join that one. Always vote against that party, and you will always vote about right. I am a Republican, but I will shake hands with fraternal love, with any Democrat who votes against that record. That kind of a Democrat is always a good enough Republican for me.

P. S.—I have never found that kind of a Democrat.

CLEVELAND'S MORALITY.

The following letter has been received by Rev. C. R. West, editor of the Chicago Advance, a leading Baptist paper of that city:

Buffalo, N. Y., July 12, 1884.—Dear Advance—It may be too late to do you any good and may not be needed, but I feel moved to warn you against saying much to the credit of Grover Cleveland. He is a libertine. No Christian should condone his crimes so far as to commend his candidacy. About seven years ago he seduced the head of a cloak department in Flint and Kent's, leading merchant's here. He kidnapped the woman after the boy was born, sent her to the Catholic Insane Asylum and took the child from her. She escaped, got Milo W. Whitney to help her, finally settled and gave up the child for \$500. This I know to be true, for I have it confirmed by Flint and Kent, and by Mr. Whitney her attorney, and by Mrs. William Baker, where the woman that Cleveland seduced boarded.

Cleveland has the reputation here of the grossest licentiousness. Judge Jas. Sheldon, of the Superior Court, told me this week that he has direct proof of his recent attempt to seduce a young lady of excellent character, but she, becoming aware of his intent, repelled him so spiritedly that he beat a hasty retreat. I have written to the Independent and Christian Union, and they will play shy of him, though they did speak of him as irreproachable. Having seen nothing in the Advance to alarm me, I did not write you, but it will do no harm for you to know the facts. Yours,

Geo. H. Ball.

Charles Moore, a brakeman on Conductor Roberts' freight train, paid us a call this morning. He informed us that at 9 o'clock this morning when they arrived at Belmont, the highest point the A. and P. crosses the San Francisco Mountain divide, the water cars had icicles hanging on them six inches long.

Flagstaff Champion, July 19.

At the farthest it is said August 5th will witness the passing of trains over the new bridge across the Colorado river at The Needles. This, completed with the transfer of the Mohave branch of the Southern Pacific, which is said to be already accomplished, will make the Atlantic & Pacific not only the shortest, but the popular line for passenger travel and freight between the east and west and south and west.

The entire route of the Southern Pacific is now in good running order with the exception of the bridge at Yuma. Transfers of both freight and passengers are made at this point in such a short time that the delay scarcely made up.

SHUTTING DOWN.

We take to pleasure in reading accounts of depression in mining interests in any part of the country, nevertheless there is some cause for congratulation in the fact that while camps in the north and northwest, are experiencing hard times, those in New Mexico and Arizona are generally prosperous. As an illustration of how things are going in Nevada, we take this item from the Eureka Sentinel:

The Richmond works, exclusive of the refinery, closed down Saturday and some seventy-six men were immediately thrown out of employment thereby. The refinery, also, will be closed in about three weeks, as soon as a clean up can be made. This will put out on the streets some forty more employees. It is estimated that there are in the neighborhood of 200 men living in the town and employed at the reduction works that will lose their employment by the closing down. Other laborers to a considerable number will be affected by the shutting down.

Col. Russell H. Conwell's admirable "life" of Blaine is now ready; it is handsomely bound and printed, and contains upwards of 500 pages; it is illustrated by first-class artists; it is from the press of Messrs. E. C. Allen & Co., of Augusta, Maine. As a rapid biographer, Col. Conwell doubtless stands without a rival in America, and the volume has the impress of the broadest information and most careful attention on every page. This is the biography that received the inestimable benefit of the active co-operation and assistance of Mr. Blaine, his relatives and friends; this is the volume that is recommended by the family and private Secretary of the distinguished Candidate; it is a true picture, drawn by a master hand, of the life of the statesman from the humble cradle to the present day, and presents a striking contrast to the score of so-called "lives" which are to a large extent filled with irrelevant matter made up from the newspapers of the day; those who are wise will subscribe only for the authentic August edition, the largest, cheapest, hand-somest and best. The steel-plate portraits of Blaine and Logan were engraved for the volume and are a standing rebuke to the caricatures which appear in the so-called "lives" with big pretensions. We understand that this Authentic Standard August edition is out-selling all others more than ten to one, and that its agents are meeting with the most phenomenal success. A few more agents are wanted by the publishers; the most liberal terms are offered. It is a splendid chance for beginners, as with this grand book no one can fail to do a great business. The volume also contains a biography of John A. Logan.

Con Cutler, who came up from Fairbanks the other day informed the Epitaph that he there met on the train Julian Alaman, of Guaymas, and Juan Acuna, of Banamichi, two prominent citizens of Sonora, who told him that the yellow fever was raging to a fearful extent in Hermosillo, and that the people were leaving there by the hundreds; three thousand already having left the city. There was not a business house remaining open. For the past week there had been from eight to ten deaths a day, and yesterday was worst of all. The cars were crowded with refugees fleeing from the saffron scourge. Two of those refugees, one an American and one a Mexican, died yesterday at Nogales. Among those who died at Hermosillo were Senior Castaneda, a prominent merchant, and the eldest daughters of Manuel Escalante and Augustine Pesquero. The epidemic is represented to be terrible in its death-dealing force.

Last Sunday afternoon the hoisting works of the Hackberry mine were destroyed by fire, together with the blacksmith shop, a lot of tools, powder, candles and a large quantity of mining timbers. But little could be done to save any of the property, owing to the fact of giant powder being stored in the building. A letter from Mr. Howell, the energetic manager of the company says that the boiler and pumps have been repaired and put in good shape and that new hoisting machinery will be in position in a few days, and then everything will go on as usual. [Mohave Miner 24th inst.]

The Tucson Citizen announces the sale of the Guashtit mines, in Pima county, to a party of Missouri capitalists. Three hundred thousand dollars will be expended in the erection of new works. A 20-stamp mill and a reverberatory furnace are among the contemplated improvements. It is claimed that the mines contain a large quantity of low grade ore that will average \$25 per ton, which, with the increased facilities for reducing it, will pay handsomely.

Says the London (Eng.) Mark Lane Express: "Considering the wholesale appropriation of American lands by British capitalists that has been going on lately, it is quite time that something should be done to stop it; otherwise all the evils of our landlord and tenant system will soon be rampant in that country."

Pinal county is the "boss" of the Territory. No debt; \$40,000 in the treasury, and more taxes near at hand. A remarkable showing for a county of such limited territory, and bang up evidence that there is a lot of mismanagement in every other county in Arizona.

An "Irish Blaine Brigade" has been organized in Troy, N. Y. It started off with an enrollment of 100 members, every one of whom has always voted the Democratic ticket, and it is expected that the membership will rapidly increase to 500 or 1,000.

Capital only is needed in New Mexico and Arizona to turn a hundred good districts into wealth producers.

The time is not far distant in the past when it was practically to mention each separate improvement that was taking place in and around our town, but the gradual and steady growth of that which in the near future will be the largest, most beautiful, and most desirable mining town on the Pacific coast to live in, precludes the possibility of giving special mention to the numerous buildings as they make their appearance in the different sections. Although but few structures of any considerable importance have gone up so far this summer, a great many improvements have been made in every section of the town, and the full extent can only be realized by an extended stroll over our picturesque "eagle's nest."

One of the professors of the University of Texas was engaged in explaining the Darwinian theory to his class, when he observed that they were not paying proper attention. "Gentlemen," said the professor, "when I am explaining the peculiarities of the monkey I wish you would look right at me."—Texas Siftings.

It is said that Secretary Teller will shortly issue an order which will allow the locators of the San Carlos coal fields to go to work upon their claims, and insure them against being driven off by the military.

The passenger trains going east are running on a "go as you please" schedule, the past week being all the way from one to four hours late. The transfers at the Colorado river causes these delays.

The Hon. Tom Fitch, by a card in the Citizen of the 24th inst., declines to come out as a candidate for the Republican nomination as Delegate to Congress.

Hon. A. C. Baker, of Phoenix, squarely announces himself as a candidate for nomination as Delegate to Congress on the Democratic ticket.

Mormon immigrants are flocking into Apache county in large numbers. A colony of 500 families will settle near St. John's.

Queen Victoria is sixty-five years old, has reigned forty-seven years and has been a widow twenty-three years.

This has been a very hard year upon the railroads of the whole country in general and this section in particular.

CHEMISTS HAVE ALWAYS FOUND

The Most Perfect Made.

A PURE FRUIT ACID BAKING POWDER. There is none stronger. None so pure and wholesome. Contains no Alum or Ammonia. Has been used for years in a million homes. Its great strength makes it the cheapest. Its perfect purity the healthiest. In the family loaf most delicious. Prove it by the only true test.

THE TEST OF THE OVEN.

MANUFACTURED BY STEELE & PRICE, Chicago, Ill., and St. Louis, Mo. Bakers of Hotels, Restaurants, and Private Families. We make no second grade goods.

Prescriptions Carefully Compounded

Monumental Evidence! Still Liveth.

The Royal Baking Powder Unequaled for Purity and Wholesomeness.

The following certificates from well known chemists and scientists form as strong an array of evidence as was ever given in behalf of any article of human food:

Government Chemist's Reports:

Prof. Edward G. Love, the Government Chemist, says: "I have tested a package of Royal Baking Powder which I purchased in the open market, and find it composed of pure and wholesome ingredients. It is a cream of tartar powder of a high degree of merit, and does not contain either alum or phosphates, or other injurious substances." E. G. LOVE, Ph. D.

Prof. H. A. Mott, Government Chemist, says: "It is a scientific fact that Royal Baking Powder is absolutely pure." H. A. MOTT, Ph. D.

Wm. McMurtrie, Professor Chemistry, Illinois Industrial University, Department of Agriculture, says:

"The Royal Baking Powder has been used in my family for many years, and this practical test as well as the chemical tests to which I have submitted it, prove it perfectly healthful, of uniform excellent quality, and free from any deleterious substance." Wm. McMurtrie, E. M. Ph. D.

Rush Medical College, Chicago.

Dr. Walter S. Haines, Prof. Chemistry, Rush Medical College, Chicago, says:

"I have recently examined a package of Royal Baking powder purchased by myself in the open market, and have found it entirely free from adulteration and injurious substances of all kinds. I have several times before tested the Royal Powder, and have always found it, just as in my present examination, skilfully compounded and composed of the purest materials." WALTER HAINES, M. D.

Dr. H. D. Garrison, Professor Materia Medica and Toxicology, Chicago college of Pharmacy, says:

"I have examined a package of Royal Baking Powder, obtained from my grocer, and find it to be composed of pure and wholesome materials in correct proportion. It contains no alum or other injurious substance. The purity of the cream of tartar employed in this powder is worthy of special mention, since it does not contain the tartrate of lime usually present in baking powders in which cream of tartar of inferior quality is used." H. D. GARRISON, M. D.

College of Physicians and Surgeons, Chicago:

Prof. C. B. Gibson, chemist, College Physicians and Surgeons, Chicago, says: "I recently procured a sample of your (Royal) baking powder from the kitchen of a private family in this city, and subjected it to an examination. I found it so different from any of the baking powders advertised as 'strictly' and 'absolutely' pure and so far superior, that I thought you would be pleased to know it, and might find use for the certificate."

"In view of the vast difference and stupendous frauds that are offered to the most 'gullible' people on the face of the earth, it pleases me occasionally to strike an 'honest article'." C. B. GIBSON.

Kentucky State College.

Dr. A. E. Menke, Professor of Chemistry, Kentucky State College, says:

"I have very carefully examined a package of Royal Baking Powder, and find it to be a cream of tartar powder of high strength, not containing any terra alba, alum, or other deleterious ingredient, everything being pure and wholesome." ALBERT E. MENKE.

Prof. Henry Morton, president of Stevens Institute of Technology, says:

"I have examined a package of Royal Baking Powder, purchased by myself in the market. I find it entirely free from alum, terra alba, or other injurious substance." HENRY MORTON.

Dr. J. H. Wright and Dr. Albert Merrell, analytical chemists, late the firm of Wright & Merrell, St. Louis, each says:

"I have made a careful analytical test of Royal Baking Powder, purchased by myself in the open market here, and in the original package. I find it to be a cream of tartar powder of the highest grade of strength, containing nothing but pure, wholesome, and useful ingredients." JUAN H. WRIGHT, M. D.

ALBERT MERRELL, M. D.

The "Reception" Restaurant,

NORTH MONTEZUMA STREET

This New Restaurant, under the management of

MR. BENJ. BUTLER,

is now open to the Public, where all the delicacies can be had

their season. Board per week, \$8. Single Meals, 50c.
